Push Indicator Dye Test

PATENTED

ARROWPACK Push Indicator Dye Test is a new generation of Ink Test for routine testing of your different sealing devices

ARROWPACK Push Indicator Dye Test is specially developed to check the integrity of your seals, produced with your different heat sealer. (for Paper and Tyvek packaging)

With this ink test you can easily, safe and quick, perform a ink test according to the ISO 11607-1 as written in appendix B.

With this first ARROWPACK Push Indicator Dye Test you can safely do your own Quality Dye test without damaging the seal (no using of pipettes or other strange objects for filling).

The ARROWPACK Push Indicator Dye Test is packed (30 pieces) in a special pack for easy applications, the aluminum package will protect the test ink of light influence.

An other great advantages of ARROWPACK Push Indicator Dye Test is that you can prepare and seal your test pouch in advance, without the risk of leakage or migration of blue methylene on value objects in your work area.

How to use Push Indicator Dye Test

1. Step one

Put the test in The pouch or sleeve

2. Step two

Seal the pouch or sleeve

3. Step three

Press the test in the direction of arrow

4. Step four

4. Observe 5 sec per seal

Observe 5 seconds per seal. Discard the tested pouch after 20 seconds!

Its 's recommended to document the results on the Push Indicator Dye Test sheet, which is supplied by ARROWPACK.
